3.6 Voronoi diagrams

Checklist

What you should know

By the end of this subtopic you should be able to:

- draw a Voronoi diagram for a given number of points
- Identify the site closest to a given point
- add a site to an existing Voronoi diagram and draw the new diagram.
- apply the 'toxic dump' problem to different situations
- find the equation of an edge of a cell
- calculate the area of a region.
